

## CTIC Terminals

### Protectowire Linear Heat Installation Accessories

#### Description

The CTIC splicing terminals are used when splicing CTI detectors. This kit includes male and female connectors.

Material: Glass-filled thermoset

Temperature Rating: 400°F (205°C) continuous

Molded completely in one piece, CTIC connectors eliminate terminal cap and fasteners.

Twin molded-in channels allow user to install conductors for quick, reliable hook-up.

Prongs and inserts are permanently mounted; provide dependable screw connection to extension wires.

Correct polarity must be maintained
